

UPPF
PREDATOR - LIKE PROTECTION

ABOUT US

GLOBAL FOOTPRINTS

UPPF is a world leader in high-performance automotive films trusted in over 85 countries. Since 1996, we've been redefining protection with our advanced TPU and biomimicry-inspired PLATICOAT™ technology, engineered for outstanding clarity, durability, and biomimicry-inspired PLATICOAT technology engineered for outstanding clarity, durability, and fast self-healing. Our agile asset-light model and strong dealer network drive innovation and reliability. Partnering with big brand car companies, UPPF continues to set new standards from our offices in Singapore, Shanghai, and Houston.

- Optical PET
- PLATICOAT™ Polyurethane Coating
- Optical Non-Yellowing TPU
- Multilayer Color Function Layer
- Invisiglu™ Repositionable Adhesive
- Release Liner

INSPIRED BY NATURE ENGINEERED TO ENDURE

Durability defines us, UPPF are engineered with precision to withstand the toughest challenges road debris, UV exposure, and the test of time while maintaining flawless appearance. By focusing on advanced engineering and premium materials, we deliver protection that doesn't fade, peel, or fail. Every UPPF product is built not just to last, but to endure beautifully.

NATURE'S ARMOR. PERFECTED

BEHIND UPPF'S PLATICOAT™ TECHNOLOGY

The science behind UPPF's cutting-edge paint protection film technology is inspired by the **placoid scales** of sharks – super hard, low-drag microstructures that resist abrasion and contaminants. Mirroring that biology, our elastomeric TPU disperses impact and self-heals, while our hydrophobic, UV-stable surface. The results are optically clear protection that repels grime and remains vivid for years

HAMMERHEAD

Flagship Clear PPF

Clear PPF

Hammerhead Clear PPF with Coating technology PLATICOAT™ for stain-resistance is specifically serving our customer. Besides, Clear PPF is a transparent adhesive film for protecting automotive paint and other vulnerable surfaces from chips, scratches, discoloration and punishing outdoor weathering.

CATEGORY	VALUE	CATEGORY	VALUE
Top Coating	PLATICOAT™ NANO	Temperature Resistance	-40°-120°
Base Film Type	Polycaprolactone Aliphatic TPU	Tensile Strength (GB/T 17657-2013)	21 MPa
Adhesive Type	Repositionable Acrylic PSA	Elongation (ASTMD-882)	343.5%
Self-healing	PASS	60° Surface Gloss (GU)	93.2
Film Thickness	8 mil	UV Rejection	95.5%
Film Specification	60 in. x 50 ft.	Chemical Resistance	PASS
Warranty	10 Years	Initial Peel Adhesion	22.5 N/in

SIGNATURE FEATURES

360 Protection

UPPF paint protection film combines a soft-touch, highly stretchable armor layer with high-performance TPU material to provide full-coverage protection for your vehicle's paint, effectively shielding against stone chips and other external impacts.

Easy Maintenance

The smooth, high performance surface of UPPF films makes cleaning effortless and helps maintain a showroom-like appearance with minimal effort.

Anti Yellowing

UPPF uses premium aliphatic polycaprolactone-based TPU materials with outstanding UV resistance, keeping the film clear and preventing yellowing over time, ensuring your car maintains a vibrant, glossy finish.

Easy Maintenance

Easy to clean and maintain using UPPF Car Care Products specially formulated for TPU-based paint protection film.

Extended Lifespan

Our proprietary Platicoat™ topcoat automatically heals light scratches and swirl marks, reducing the need for frequent repairs and touch-ups.

Smart Value

Protecting your vehicle's original paint while offering long-term peace of mind, UPPF films come with a 10-year warranty, combining premium quality with cost-effective protection.

Lasting Bond

Our proprietary Invisiglu™ Technology creates a strong, lasting bond between the car body and film, ensuring the film remains securely adhered for the long term.

Stain Resistant

Similar to the placoid scales of sharks, the film resists stains and environmental contaminants.

Self-Healing

Our proprietary Platicoat™ topcoat automatically heals light scratches and swirl marks, restoring the surface to its original condition.

Water Repellent

Hydrophobic Platicoat™ topcoat repels water, dirt, road grime, and other contaminants with its slick surface that prevents debris from adhering.
